Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2154

1. Claim 1 is pending in this application.
2. The description portion of this application contains a computer program listing consisting of more than three hundred (300) lines. In accordance with 37 CFR 1.96(c), a computer program listing printout of more than three hundred lines must be submitted as a computer program listing appendix on compact disc conforming to the standards set forth in 37 CFR 1.96(c)(2) and must be appropriately referenced in the specification (see 37 CFR 1.77(b)(4)). Accordingly, applicant is required to cancel the computer program listing appearing in the specification on pages 14-97, file a computer program listing appendix on compact disc in compliance with 37 CFR 1.96(c) and insert an appropriate reference to the newly added computer program listing appendix on compact disc at the beginning of the specification.
3. The spacing of the lines of the specification (pages 6-97) is such as to make reading and entry of amendments difficult. New application papers with lines double spaced on good quality paper are required.
4. The disclosure is objected to because it includes figures (pages 9-11) outside the submitted drawings indicated in "Brief Description of the Drawings" section.
5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 2154

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

6. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Sandler et al. (US 6,378,069), hereafter "Sandler".

7. As to claim 1, Sandler discloses the invention as claimed including a method for automatically upgrading software on a device (abstract), the device having a processor (304, Fig. 3) and memory coupled to the processor (308, Fig. 3), wherein the memory stores the software (308A-308D, Fig. 3), and wherein the device is an automated data collection device (inherent in col. 6, lines 30-42), the method comprising: coupling the device (106, Fig. 1) to a server (112, Fig. 1) having an upgrade utility and upgrade software stored thereat (202, 204, 206, Fig. 2; and col. 5, lines 1-33); providing data communication between the device and the server (210, 212, Fig. 2), and the upgrade utility determining a configuration or status of the device (col. 5, lines 10-22); and upgrading the software of the device by adding additional software to the device (col. 7, lines 50-60).

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
